

# Application for Complimentary Consulting from Allen Dietrich, NAPCRG Past President

## Pilot Offer

From those submitted for consideration to this NAPCRG pilot, I will select 2-3 research applications in development for NIH or CIHR. I will then contact to PI to get the full application to review in detail and provide comments and suggestions in a follow up telephone call. Applications should be in near final form when they are sent to me for review. Revised resubmissions of previously scored but unfunded applications are especially welcomed.

## Eligibility

NAPCRG attendees who will have an NIH or CIHR application ready for review by year-end and who have not previously had an NIH R21, R01 or other NIH or CIHR research award. Note, having a past or current K award or other carrier development award is NOT a disqualifier.

## Selection Criteria

I will use my discretion to select applications that I feel best able to help based on the description submitted and the match with my experience and skills.

## Research Background

Allen Dietrich - I have participated in AHRQ, NCI, and NIMH study sections and have had funding success myself.
