Transforming Clinical Practice Initiative (TCPI)

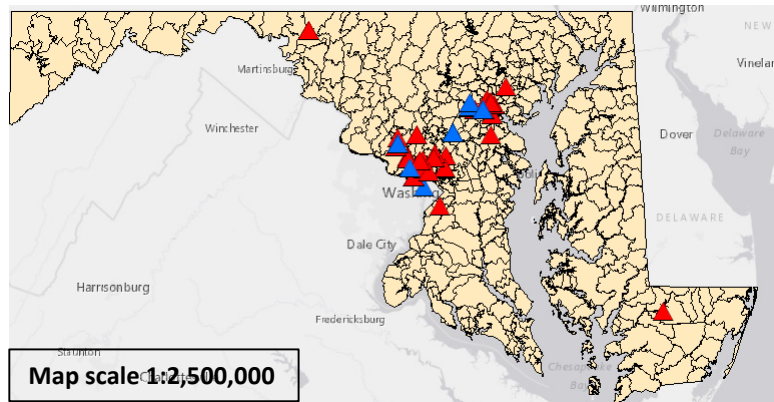

- One of the largest federal investments uniquely designed to support clinician practices through nationwide, collaborative, and peer-based learning networks that facilitate large-scale practice transformation
- Centers for Medicare & Medicaid Services (CMS) is investing up to \$685M in providing hands-on support to practices for developing skills and tools needed to improve care delivery and transition to alternative payment models
- Initiative's goal is to generate up to \$4B in savings to the federal government and commercial payers

Overview of PTN Services

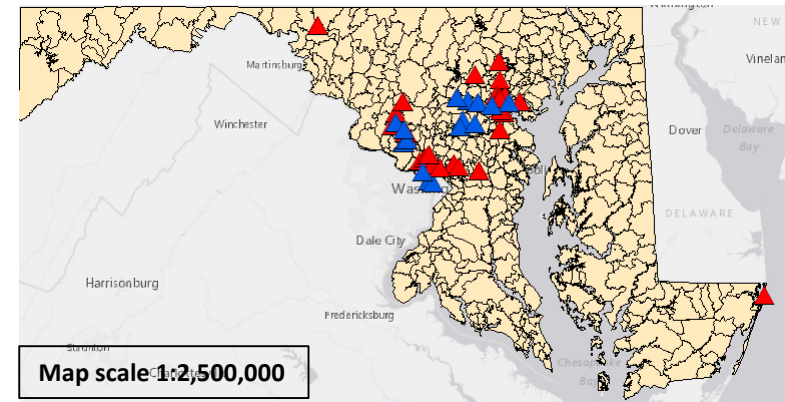

- Transform clinicians and practices by offering the following assistance:
 - Customized coaching;
 - Leverage meaningful use;
 - Incorporate patient centered medical home (PCMH) concepts into practice workflows;
 - Physician quality reporting support and interpretation of results;
 - Prepare practices for alternative payment models (APM);
 - Data analysis for quality workflow and revenue improvement;
 - Measure outcomes for value-based payments under the Quality Payment Program

	Practices	Practice Sites	Practitioners
Total Enrollment	48	109	839
Current Enrollment	32	73	291

- Performing practice assessments every six months to assess transformation areas, such as patient and family engagement, team-based relationships, and population health management
- Collecting and assessing Key Performance Indicators for practices and providers quarterly
- Working with eligible practices to submit data for MIPS and review feedback reports
- Updating practice analytics dashboards to assist in transformation efforts

Need for an Analytics Dashboard

- Difficult for practices to see the big picture when data isn't presented together
- Coaches have difficulty sharing data with practices
- Data is fragmented, difficult to obtain
 - Quality and Resource Use Report (QRUR)
 - Electronic health record (EHR) data
 - Claims data
- Some data reports are too technical or full of ancillary information
- Easy way to view transformation progress

Sample Dashboard for Providers

Other Key Performance Indicators not Shown:

- Care Plan
- Colorectal Cancer Screening
- Diabetes: Hemoglobin A1c Poor Control
- Diabetes: Medical Attention for Nephropathy
- Tobacco Use: Screening and Intervention

Practice: Jane Doe, MD
Tax Identification Number: 123456789
Enrollment Date: 12/12/16

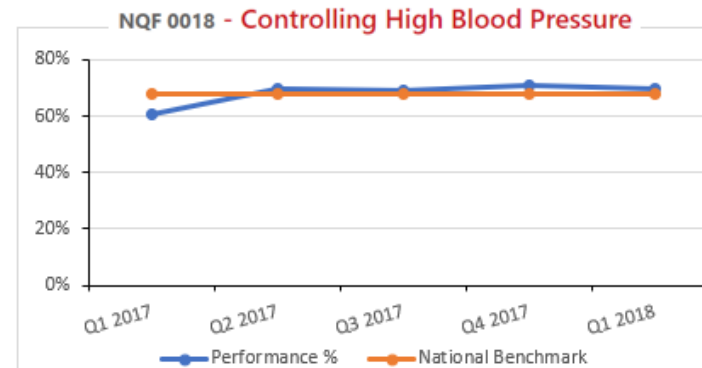

Quality and Resource Use Report (QRUR) 2016	Total Beneficiaries	Cost	National Benchmark
Practice Total	381	\$10,518	\$12,380
Diabetes	163	\$15,583	\$18,420
*COPD	33	\$25,358	\$29,613
*IHD	34	\$24,524	\$22,117
*CHF	34	\$29,641	\$33,953
Readmissions Rate	58	15.36%	15.29%

*Chronic Obstructive Pulmonary Disease, Ischemic Heart Disease, Congestive Heart Failure

Total Cost Difference 2015 to 2016 QRUR:	-\$99.86
2016 QRUR Average Risk Score	69 th Percentile
Current Phase in Practice Transformation	Phase 4
CRISP Connectivity	Yes
Patient and Family Engagement	

Active e-tool	NO	Health Literacy Survey	NO
Shared Decision-Making	YES	Support for Patient & Family Voices	YES
Patient Activation	NO	Medication Management	YES

Key Performance Indicators- EHR: SMART EHR

Practice Transformation Progress

SUMMARY	#	Ct	Pct
Counts of Concepts Complete (Counting the Colors)			
Phase 1 =	1	1	100 %
Phase 2 =	12	12	100 %
Phase 3 =	13	13	100 %
Phase 4 =	16	13	81 %
Phase 5 =	2	0	0 %
Total	44	39	89 %

Analytics Dashboard Practice Survey

- Practices were surveyed on their responses to three questions regarding the analytics dashboard:
 - Have you previously reviewed your QRUR data?
 - Is your response to your analytics dashboard positive?
 - Do you plan to act on the data presented on your analytics dashboard?
- Practices were surveyed by coaches during monthly site visits

Survey Results

Practice Type	Previously Reviewed QRUR Data		Had Favorable Response to Dashboard		Found Dashboard Data Actionable	
	Yes, No. (%)	No, No. (%)	Yes, No. (%)	No, No. (%)	Yes, No. (%)	No, No. (%)
Primary care (n = 11)	11 (100)	0 (0)	8 (73)	3 (27)	6 (55)	5 (45)
Specialty care (n = 14)	13 (93)	1 (7)	10 (71)	4 (29)	6 (43)	8 (57)

- Survey response rate was 86% (N=29)
 - 72% had a favorable response to the dashboard
- 48% found dashboard data to be actionable
 - Practices develop action plans to improve key performance indicators
 - EHR challenges prevented accurate data collection and reporting in some practices
- 92% reported previously reviewing QRUR data
 - Many found the QRUR to be cumbersome

Other Responses to Analytics Dashboard

- Coaches found it easier to relay data to practices when using the dashboard
- Dashboard helped to structure conversations with practices
- Dashboard helped to identify areas where improvements could be made
- Promoted celebration among practices surrounding
 - QRUR cost savings
 - Disease burden scores
 - Practice transformation progress

Summary of Analytics Dashboard Key Benefits

- Easy way to compile multiple data reports into one tool for quick review
 - Allows smaller practices without dedicated quality improvement staff to better manage multiple data sources
 - Data review is a critical factor to practice success in health system redesign
- Structures the conversation around practice transformation and potential areas of improvement
- Can be shared with all practice staff to encourage the development of “Champions”
- Shows change over time across multiple data sources
