2025 NAPCRG Annual Meeting Research Categories and Study Designs

Research Categories	Study Designs
1. Acute Respiratory infections and other infections 2. Acute, emergency, and outpatient care 3. Artificial Intelligence (AI) in primary care 4. Behavioral, psychosocial, and mental illness 5. Big Data 6. Cancer research (not screening) 7. Cardiovascular Disease 8. Child and adolescent health 9. Community based participatory research, patient engaged research 10. COVID-19 11. Diabetes and endocrine disease 12. Dissemination and implementation research 13. Economic and policy analysis 14. Education and training 15. geriatrics 16. Health care disparities 17. Healthcare services, delivery, and financing 18. Mixed methods research 19. MSK 20. Obesity, exercise, and nutrition 21. Pain management 22. Planetary Health 23. Population health and epidemiology 24. Practice management and organization 25. Prescribing and pharmacotherapeutics 26. Qualitative research 27. Research and advocacy 28. Research capacity building 29. Research methodology and instrument development 30. Screening, prevention, and health promotion 31. Secondary data analysis 32. Survey research or cross-sectional study 33. Systematic review, meta-analysis, or scoping review 34. Women's health	1. Clinical trial 2. Evaluation of diagnostic or screening test 3. Observational study (cohort, case-control) 4. Survey research or cross-sectional study 5. Systematic review, meta-analysis, or scoping review 6. Economic or policy analysis 7. Secondary data analysis 8. Qualitative research 9. Mixed methods research 10. Patient engagement research 11. Community-based participatory research 12. Dissemination and implementation research 13. Instrument development / psychometrics
